***** This is the second book in the Impressions of Sedona Series of Photo Books by Al Judge. Each book in the series focuses on one of the many aspects of life in Sedona. To see the other books in the series, just click on my name and go to my author page for a complete list of my books. If you have ever visited Sedona these books should bring back some great memories. On the other hand, if Sedona has never shown up on your radar screen you might want to consider a visit after viewing these images. Either way, I hope that you find these images as inspiring as I do. Although Jerome is not actually a part of Sedona, it is a popular day trip for people visiting Sedona. Jerome is an Artist Community of about 450 residents and was once a booming mining town. It has a great deal of character, great restaurants, numerous art galleries, a mining museum, and the remains of the Gold King Mine. It also has some of the most spectacular views in the area. On a clear day you can see the San Franscisco Peaks in Flagstaff.

***** Reviews have a great deal of influence on which books come up at the top of the list when someone searches for a particular topic. Amazon considers them an important indicator of interest and tries to put the books that gather the most interest at the top of the list. With that in mind, any honest evaluation will be greatly appreciated. It will help others to find my books and tell me what I need to do to

make them better. If you prefer a bit more personal contact I can be reached at ajudex@hotmail.com. Just place eBook in the subject line so that it doesn't get tossed out with the junk mail.
